MULTIFLEX CONSOLE

Height adjustable in 3-mm steps

- No construction expenses
- No mechanical reworking
- Sturdy construction
- 100 % reusable
- Console height 250-700 mm (only 3 items)
- Short procurement time
- Immediately replaceable in case of fixture crash
- Wide range of applications

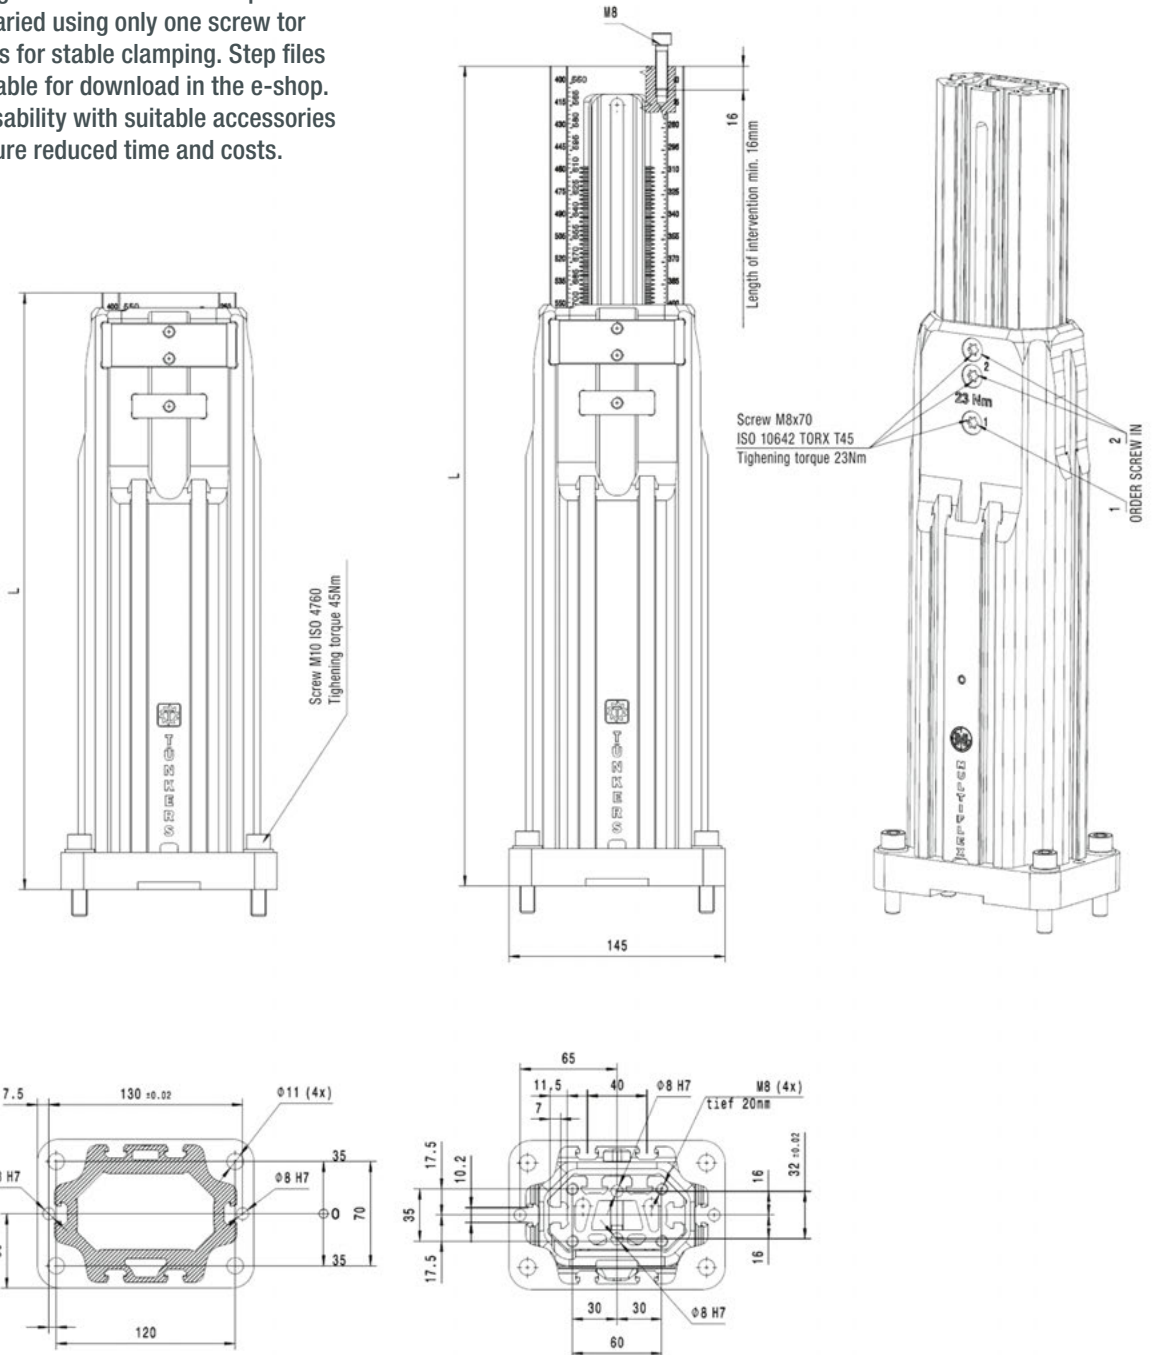

No construction expenses for the suitable clamping console in the device construction.

Multiflex console

Three consoles in the heights 250-400 mm, 400-550 mm and 550-700 mm offer 150 height variants in 3 mm steps. The Multiflex console can be varied using only one screw for locking the height and 2 screws for stable clamping. Step files for all height settings are available for download in the e-shop. Immediate availability and reusability with suitable accessories for connecting the clamps ensure reduced time and costs.
